01. the overview.

The NFT E-League is comprised of 14 individual teams with separate brand identities under the NFT E-League umbrella. Attracting fans from around the world, the NFT E-League developed the model for the successful modern e-sports league, including extensive revenue sharing, competitive excellence, strong franchises across the board, and national distribution.

Outside of the League's headquarters in Wyoming, the NFT E-League expands worldwide with NFT Media based on Youtube, Twitch.tv, Facebook, Instagram, and in conversation with Hulu.

Typography is a vital aspect of our identity and contributes to our distinctive aesthetic. Type tells a story. The right typefaces, used consistently, build character and brand recognition.

Montserrat.

The old posters and signs in the traditional Montserrat neighborhood of Buenos Aires inspired Julieta Ulanovsky to design this typeface and rescue the beauty of urban typography that emerged in the first half of the twentieth century. As urban development changes that place, it will never return to its original form and loses forever the designs that are so special and unique. The letters that inspired this project have work, dedication, care, color, contrast, light and life, day and night! These are the types that make the city look so beautiful. The Montserrat Project began with the idea to rescue what is in Montserrat and set it free under a libre license, the SIL Open Font License.
